

# Acadian Total Security:

## *Resources to protect your people, property and fleet*

*Solutions that seamlessly integrate your security with your business to keep you informed and in control around the clock.*

### Property

Acadian Total Security offers a full suite of business security systems and automation services tailored to support a wide range of businesses of any size, from single locations to large enterprises. We'll work with you to develop a custom security plan that meets your needs. With Acadian Total Security, you'll have peace of mind knowing that your properties are protected and your business is running smoothly, no matter where you are.

|                                   |                                    |
|-----------------------------------|------------------------------------|
| Burglary protection               | Fire and carbon monoxide detection |
| Video surveillance and monitoring | Access control systems             |
| Panic and holdup alert systems    | Remote audio communication         |
| Energy efficiency and automation  | Thermal imaging                    |

### Fleet Management that Empowers Business Decisions

Tracking vehicles and assets in real time saves your business time and money, whether you're an individual, small company or large corporation. Fleet management isn't just about the location of your company's vehicles. With Fleet Management by Acadian Total Security, you will increase productivity, efficiency, safety and maintenance management capabilities using the latest in GPS, satellite, cellular and web technologies.

### Vehicles

Web-based fleet management allows you to see all your vehicle and driver information in one place and use it to make quicker, better-informed decisions for your business.

- Telematics
- Dash cams
- DOT compliance

### Equipment

Real time solar powered asset / container tracking with data logging, GPS location and data communication. Fleet managers have complete transparency of location, speed and battery level percentage. Rules, such as a low battery rule, can be set to send a notification to the fleet manager. Future capabilities include tractor power detection, temperature monitoring, door sensors and tire pressure monitoring.

### Protecting Lone Workers

Lone workers cannot always be protected by conventional means, but with the right devices, it's easier to monitor the safety and location of a lone worker. Our personal tracking devices supply vital communication between a lone worker and emergency aid. GPS satellite identification provides the worker's location, so help can arrive as quickly as possible.

The Acadian Shield is a mobile app that can notify emergency personnel if you are in an unsafe situation, giving you protection in the palm of your hand.

### About the Vendor Alliance Program

FCCI Insurance Group's Vendor Alliance program provides risk management solutions to help businesses reduce the risks they face every day.

FCCI's Vendor Alliance Program is offered to assist policyholders in compliance and risk control efforts and does not attempt to identify all legal requirements, potential hazards or remedial actions. FCCI Insurance Group shall not be liable for any claim, loss or expense arising out of the use of any suggested risk control measures or the purchase or use of any resource, product or service provided by any vendor referenced herein. FCCI is not affiliated with and has no ownership, control or interest in the vendors or the resources, products or services. FCCI makes no representations and provides no legal advice regarding such resources, products or services referenced herein. You are solely responsible for complying with federal, state and local laws, including compliance with any changes in the law, and for the safety of your operations.
