

SafetyFirst Offerings

EDRIVERFILE	• Automated or on-demand MVR ordering • Individual or bulk MVR ordering • MVR scoring built with client's own criteria • Blended risk scores (MVR, hotline, telematics, past crashes) • Transmission of driver safety policy updates • DOT compliance support (DQ file maintenance) • Crash reporting • Driver notices by email • Integration/aggregation of telematics alerts into 'driver events' • Training validation and reminder notices • Certification renewals (e.g., specialized training) • Annual certification of violations (self-reporting) • eSignatures/eForms • Vehicle details, location assignments, etc. • Qualification reminder notices by email (e.g., 30/60/90-day expired notices about impending license renewal, etc.)
MVR MONITORING	• Alerts are sent 'as they transpire,' eliminating the danger of the yearly 'grace period' between annual MVR orders. This allows for immediate corrective action to be taken with your driver. • Preventable accidents are reduced because only qualified drivers are on the road. • The service is automated and managed by SafetyFirst. • Exception reporting alleviates the administrative burden on your company. Rather than spending hours reviewing all driver MVRs annually, you will only need to review an MVR on an as-needed basis. • SafetyFirst handles interactions with all state jurisdictions, which simplifies navigating different state laws and MVR formats.
MONTHLY TRAINING TOPICS	The SafetyFirst 10-Minute Training Topics (TMTT) provide insights into poor driving habits. Each month a new topic is distributed giving managers additional knowledge, comprehension, and the tools to approach drivers with these safety tips. The TMTT focuses on safe driving awareness to help avoid moving violations, collisions, complaint calls from the safety hotline, and telematic alerts. Each month a new a safety training topic is emailed to all designated subscribers.

SAFETY HOTLINE	The hotline program provides testimony from concerned motorists on potentially dangerous driver situations. Motorist Observation Reports (MORs) are generated and can be used as an ‘early warning system,’ alerting management of egregious behaviors which, if left unchecked, may lead to an accident. Training materials to assist with personal coaching and training are provided. Specific topics will be sent for coaching the affected driver and general topics will be sent out monthly for the benefit of all employees.
TELEMATICS	• Notification of collision, hard braking, and rapid acceleration. • Maintenance alerts/reminders based on time and mileage. • Remote Engine Diagnostics with over 200 points of engine data. • Scorecards and Dashboards configured to client’s parameters • In-cab alerts can increase driver awareness and behavior modification in real-time. • Data from Scorecards and in-cab alerts are captured on each client’s server. • Month-to-month service plans with stepped levels of services and features.
DRIVER TRAINING	SafetyFirst’s Learning Management System (LMS) assigns focused training modules to individual drivers based on their risk-taking behaviors, such as weaving in traffic, excessive speeding or running stop signs. These can be reported using our Motorist Observation Reports (MORs), TeleMatics Alerts (TMAs), or Motor Vehicle Records (MVRs) from enforcement violations.

As an FCCI valued customer, you will receive the preferred partner discount pricing.
